THERMAL LIFE® FAR INFRARED SAUNA

YOUR NATURAL PRESCRIPTION FOR RADIANT HEALTH

Detoxify your body and achieve radiant good health with the highest-quality, most effective, far infrared sauna available anywhere

DETOXIFICATION

Our level of toxic exposure far outstrips our body's natural elimination mechanisms. Studies indicate that most of us have between 400 and 800 chemical residues stored in the fat cells of our bodies. To stay healthy and strong in this chemical-ridden world, it's essential to help the body increase its removal of harmful and potentially deadly waste products.

The solution—regular, effective, whole-body detoxification. Far infrared sauna therapy boosts the body's ability to detoxify, leading to significant and lasting health benefits. In fact, use of the Thermal Life Far Infrared Sauna is recognized worldwide by medical doctors and health practitioners as perhaps the most effective method of removing both chemical and heavy metal toxins (including mercury) from the body.

“The best way to get rid of heavy metals and pesticide residues? The Infrared Sauna. My searching led me to a very reputable company, High Tech Health. You can call for information on the infrared sauna, the best sauna I could recommend.”

: Dr. Sherry Rogers, MD, noted environmental doctor

HOW DOES FAR INFRARED WORK?

Far infrared is a section of the natural band of light that is not visible to the human eye, but can be felt as heat. Unlike the high heat produced in traditional saunas, far infrared heat is able to penetrate the body to a depth of 1.5 to 2 inches. This stimulates the body's cellular detoxification process more effectively and at a lower temperature than a traditional sauna.
